Summary

I like to make meaningful things that add value and I want to build things that really, actually impact a lot of people.

I consider myself a generalist - Jack of all trades as I am eager to learn all the tools that can help me solve a problem.

Senior Fullstack Engineer with 5 years of experience building and scaling high-performance web applications. Currently leading fullstack delivery for a major enterprise hospitality platform at Merkle. Proven track record across e-commerce, adtech, hospitality, and defence sectors — consistently owning full delivery from architecture to production. Writes technical content, ships open-source tooling, and builds real products outside of work.

Technical Skills

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3

Frameworks / Libraries: React, Next.js, Redux Toolkit, Node.js, React Native

CMS & Cloud: Contentful, Cloudinary, AWS (AppSync, serverless), Vercel, Azure

Tooling: ESLint (custom plugins), Husky, CI/CD, IndexedDB, PWA architecture

Professional Experience

Senior Software Engineer — Merkle (Dentsu Group)

April 2025 – Present · Remote

Rebuilding the web platform for Leading Hotels of the World (LHW) from the ground up — new codebase, fresh UX, and expanded feature set. Sole engineer responsible for the full

technical stack while other engineers focused on single domains.

- **Frontend Architecture:** Architected the frontend in Next.js and TypeScript on Contentful CMS — multilingual support, component architecture, and automated content authoring workflows.
 - **Backend Integration:** Integrated a multi-system backend across AWS AppSync, a property management system (PMS), and SynXis for real-time pricing and availability data.
 - **Contentful + Cloudinary:** Designed Cloudinary-based Digital Asset Management workflows with Contentful content delivery, deployed on Vercel.
 - **Analytics:** Owned GTM implementation and full analytics instrumentation alongside frontend and backend delivery.
 - **AI Initiative:** Leading the development tribe in orgs initiative to implement **billable AI agents** across the SDLC by identifying high-impact use cases and architecting automated solutions to drive operational efficiency and new revenue streams.
 - Completely owned payments module.
-

Senior Software Engineer — Tech Mahindra (Microsoft — Bing Ads)

September 2023 – March 2025 · 1 year 6 months · Remote

Worked on the React frontend for risk and enforcement modules within Microsoft's Bing Ads platform — a large-scale, high-traffic adtech system serving millions of advertisers globally.

- **Performance:** Cut first-load time by **40%** through strategic code-splitting and lazy loading.
 - **DevOps:** Reduced CI pipeline build times by **20%** through build configuration improvements.
 - Improve load time of a graph based component by as much as **50%** by virtualising it.
 - **Quality:** Introduced Husky pre-commit hooks and full TypeScript coverage for the Redux layer, enforcing type safety across the team codebase.
-

Technology Consultant — PwC India

September 2021 – September 2023 · 2 years · Remote

Led frontend development across D2C, B2C, and B2B e-commerce platforms for a major Indian retail conglomerate, and a suite of government digitization projects.

- Delivered Next.js storefronts with device-specific experiences across web and

mobile; actively mentored junior engineers through implementation.

- Built and shipped cross-platform iOS and Android apps using React Native.
 - Designed an optimistic update strategy for cart interactions, eliminating concurrency bugs and enabling real-time cross-device sync.
 - Engineered a custom NextAuth.js integration to meet enterprise authentication requirements.
 - Served as primary technical liaison with senior stakeholders.
-

System Engineer — Infosys Ltd

November 2020 – August 2021 · 10 months

Developed automation scripts for the Finacle Treasury banking platform.

Key Projects

Vishuddha Comics — <https://vishuddhacomics.in>

Platform to read and discover indie comics. Always free for readers.

Tech: Next.js, Neon, Cloudinary.

eslint-plugin-contentful-migrations · [NPM](#)

Enforces GraphQL resolver annotations on Contentful + Cloudinary migration scripts. **75+ downloads.**

My Gamified Portfolio <https://manku27.dev>

A playable game-like interface which while working as a portfolio also keeps the visitor engaged, and it gave me a chance to try out HTML Canvas 2D and requestAnimationFrame to learn gamification.

JU-Bondhu (WIP)

My university is one of the best ranked in India but does not have its social portal.

The primary use case is to leverage the alumni network for referrals.

It also solves other problems that people face here - hunting for stay and decent food around the campus. I did not use google maps for this.

PK Chai · pk-chai.vercel.app

Ordering system for a Kolkata eatery handling midnight delivery across 4 college hostels.

Mobile-first admin panel with 30-minute slot batching and hostel-block grouping. Real users, real revenue. Tech: Next.js, Neon DB, Tailwind CSS.

Field Operations PWA

Engineered an offline-first PWA for mission-critical data capture in low-connectivity environments. Built on IndexedDB for local storage with background sync to a Node.js / MySQL backend — zero data loss during network intermittency. Includes live system monitoring dashboards and digitized form-capture workflows.

Rental Digitization Platform

Sole technical owner of a fullstack platform to digitize the rental market — removing friction from cross-border tenancy agreements. Integrated Sproof e-signature workflows for legally binding digital contracts across jurisdictions. Built document handling pipelines and automated contract generation from scratch.

eslint-plugin-redux-tsc · [NPM](#)

Enforces typed Redux hooks for IntelliSense and type safety. **250+ downloads.**

Hotel Reception (Dropped)— [GitHub](#)

I saw that onboarding a guest in a non-tier 1 hotel is a hassle. This project aimed at digitizing that experience and removing a lot of the friction that is involved.

It got gated as ID verification was not possible when I was actively working on this project and then I hit a compliance wall when the verification infrastructure came about.

Gemini + Sheets + WhatsApp Bot · [GitHub](#)

Order management and inventory for a bakery — operated entirely via WhatsApp, no app required.

Content & Community

- **Technical writing** — regular author on Medium; published in *JavaScript in Plain English* and other publications
 - **YouTube** (@mankuDevJS) — practical web development tutorials
 - **Two published ESLint plugins** — 325+ combined downloads, built to solve gaps I actually hit
 - **NextJS** - <https://vishuddha.leaflet.pub/> - To be turned into a book soon!
-

Honours and Awards

- **Make it Real** — Merkle
 - **Pat on the Back** — Tech Mahindra
 - **Above and Beyond Award** (×2) — PwC India
 - **Spot Award** — PwC India
-

Certifications

- Optimizely SaaS CMS Developer Certification
 - Contentful Certified Professional
 - Cloudinary Certified Implementation Specialist
 - Microsoft Azure Fundamentals
-

Education

Jadavpur University — one of India's top public engineering universities
Bachelor of Engineering · Kolkata · 2016 – 2020
